TYPICAL FREQUENCY RESPONSE, MODEL 7250AM2

TYPICAL AMPLITUDE RESPONSE, MODEL 7250AM1

Key features

- Low impedance output
- Hermetically sealed
- 360° cable orientation
- Light weight (1.8 gm)
- Flight test applications

The Endevco® model 7250AM1/2 is a subminiature, piezoelectric accelerometer with integral electronics, designed specifically for measuring vibration on small objects. The unit is hermetically sealed for use in extreme environments and to ensure long term stability. This accelerometer offers high resonance frequency and wide bandwidth, its light weight (1.8 gm) effectively eliminates mass loading effects.

The model 7250AM1/2 features Endevco's Piezite® Type P-8 crystal element, operating in annular shear mode. This accelerometer incorporates an internal hybrid signal conditioner in a two-wire system, which transmits its low impedance voltage output through the same cable that supplies the constant current power. Signal ground is connected to the outer case of the unit and, when used with the supplied isolated mounting screw/washer, it is electrically isolated from ground. The centrally located mounting bolt permits 360° cable orientation, however, the unit may also be adhesively mounted. The 7250AM1/2 features two solderable terminals designed for light weight hook-up. A model number suffix indicates acceleration sensitivity in mV/g; i.e., 7250AM1-10 features output sensitivity of 10 mV/g.

Endevco signal conditioner models 4416B, 133, 2793, 2775B, 4999, 6634C or Oasis 2000 (4990A-X with cards 428 and/or 433) computer-controlled system are recommended for use with these accelerometers.

Notes:

1. Short duration shock pulses, such as those generated by metal-to-metal impacts, may excite transducer resonance and cause linearity errors. Read TP290 for more details.
2. Maintain high levels of precision and accuracy using Endevco's factory calibration services. Call Endevco's inside sales force at 866-ENDEVCO for recommended intervals, pricing and turn-around time for these services as well as for quotations on our standard products.
